

PRASAD takes a **HOLISTIC** approach to creating **SUSTAINABLE** programming in collaboration with the communities we serve, resulting in **LIFE-CHANGING** impact across generations.

MISSION/VISION

PRASAD is committed to uplifting the lives of economically disadvantaged people around the world by implementing innovative solutions that respond to local conditions and cultures. Our shared vision is centered on the prosperity of healthy communities, thriving in harmony with the natural environment.

ABOUT PRASAD

Improving quality of life is the core driver of our work. For more than 30 years, PRASAD has been partnering with community members to design programs for long-term sustainability with multiple benefits that have lasting impact beyond an individual treatment or service.

The goal of each PRASAD initiative is to ensure well-being and empower people to achieve lives of self-reliance and dignity, helping themselves, their communities, and their environment. Having this as our central focus means that our programs are helping people now and are creating a better future for generations to come.

OUR HOLISTIC MODEL

WHERE WE WORK

India

Located in India's Tansa Valley, PRASAD Chikitsa serves 265,000 indigenous tribal people across 225 villages. Our services include general and specialized health-care, women's empowerment, childhood nutrition, education, tree planting, agriculture and food security, and sanitation infrastructure and water security. Our programs help people to build financially stable, sustainable lives.

United States

Located in Sullivan County, New York, PRASAD Children's Dental Health Program provides dental health education and comprehensive dental services to thousands of low-income children annually. Poor oral health makes it difficult to eat, sleep, play, and learn, and affects self-image and confidence. Our mobile dental clinic parks at local public schools, convenient for children and their families.

Mexico

PRASAD de Mexico partners with local sponsors, hospitals, and volunteer doctors to hold Eye Camps in rural areas of central Mexico providing free eye surgery to remove cataracts in adults and correct eye alignment in children. Restoring vision brings independence, self-reliance and raises self-esteem.

30+ YEARS OF SERVING THOSE IN NEED

INDIA

Milk & Nutrition Program: **1,540,000 servings**
